

Training Course

	ThingsPro Edge & Edge Connectivity (IIOT-CON2)
Objective	After this course, participants will be able to "put it all together" and set up a sensor-to-cloud application that includes data sources that are not directly accessible via a LAN connection from the IIoT gateway - using the skills from IIOT-CON1 and IIOT-TPE1
Prerequisites	IIOT-CON1, IIOT-TPE1
Content	Focus on data path end to end (for similar scenarios as in IIOT-CON1): ioThinx via Modbus to TPE MGate via Modbus to TPE use generic MQTT northbound interface and look at data (visualize it, e.g. via MQTT Explorer or Node Red, or Grafana Cloud)
Duration	0.5 Day
Certification	MTC IIoT
