

Training Course

IIoT Service Partner Training (IIOT-SRV1)	
Objective	<p>After this training, participants will be able to prepare each IIoT gateway and/or edge computer individually and “at scale” (= for multiple devices at the same time), using the ThingsPro Proxy Tool. In addition, participants will know how to use basic scripts provided by Moxa to execute additional steps that may be required for a specific customer project, like installing additional software, configure & secure the device and do basic quality checks automatically.</p>
Prerequisites	<p>Bring your own device(s) + subscription (where required) For participants to complete their Moxa Certified Engineers status: All other Moxa Technical College IIoT Track Trainings, except IIOT-POC1 For participants seeking to operate the ThingsPro Proxy tool as part of the distribution and customer deliver process, this training does not require any other Moxa courses, but basic Linux and Python knowledge would help to understand the advanced topics related to verification tests and beyond.</p>
Content	<p>In this course participants will learn how to put together the customer’s solution together for customer projects at scale from hardware and software from Moxa and IIoT Partners: Sensor, Software and Cloud Partners as a paid service</p> <p>After this training participants will be able to execute the following steps for each IIoT gateway and/or edge computer that is shipped to the end customer (“at scale”), using the ThingsPro Proxy Tool</p> <ul style="list-style-type: none"> Install software Configure & secure device Provision gateway in the cloud <p>In addition, participants will have a high-level understanding of additional steps that may be required that is not part of the ThingsPro Proxy’s tool’s scope.</p>
Duration	1 Day
Certification	MTC Advanced IIoT
