

Training Course

Edge Computing & Zero Touch Provisioning with AIG and Azure IoT Edge (IIOT-TPE2)	
Objective	After this course, participants will be able to take advantage of key cloud and edge computing features that Microsoft Azure provides. Specifically, participants will be able to define and implement a simple "zero touch provisioning" service that uses Microsoft Azure IoT Hub's Device Provisioning Service (DPS). In addition, participants will be able to set up a simple Azure IoT Edge (AIE) module to collect local data and send it to the cloud.
Prerequisites	IIOT-TPE1
Content	<p>In this course participants will learn the following:</p> <ul style="list-style-type: none"> Experience the value Zero-Touch-Provisioning using Microsoft Azure IoT cloud services, Moxa IIOT gateways and Proxy Tool Learn how to setup the Device Provisioning Service (DPS) Learn how to setup automatic deployments and configuration on IoT Hub Learn how to setup Moxa Proxy Tool to discover and register Moxa gateways to designated IoT Hub at scale. Experience the Microsoft OPC publisher to get data from OPC-UA servers in the field and publish to Azure Cloud
Duration	1 Day
Certification	MTC Advanced IIoT
